

Placement Management System

Day 11 Documentation

Student Portal Verification, Permission Sets & Apex Testing

Salesforce Developer Bridge Program

Target Org: PlacementOrg (sudharshan5@vishnu.edu.in)

Prepared by: Sudharshan Kuppili

1. Day 11 Objective

The main objective of Day 11 was to complete, verify, deploy, and test the student placement-management functionality in the Salesforce org. Work focused on the Student Dashboard, My Applications, application visibility, duplicate-application handling, Apex class permissions, deployment verification, and Apex testing.

2. Student Dashboard

The **studentDashboard** LWC was verified against the live org data. It is powered by **StudentDashboardController.getDashboardData()**, called through an **@wire** Apex adapter.

Verified Elements

- Welcome message using the logged-in student's name
- Total Applications count
- Applied, Shortlisted, Selected, and Rejected counts
- Upcoming Interview section (date and status)
- Quick Navigation buttons — Eligible Jobs, My Applications, Student Profile

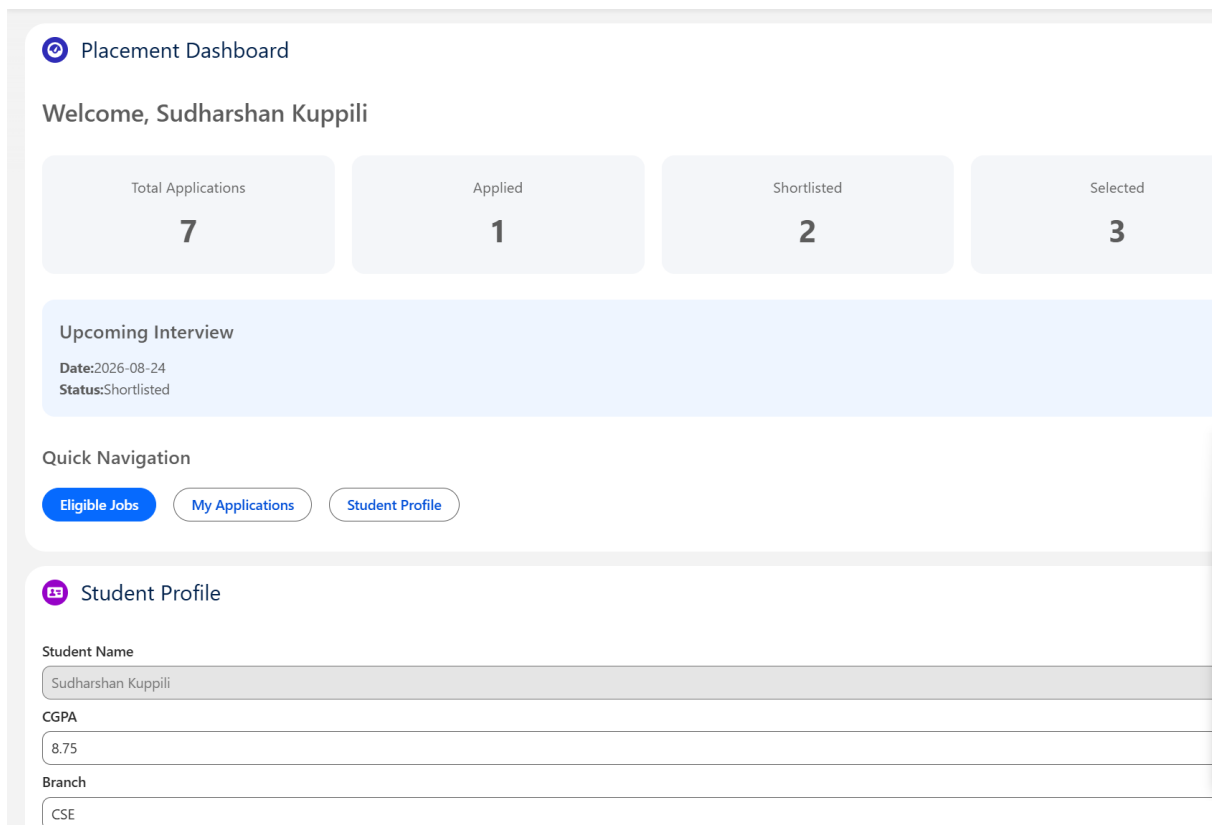

Fig 2.1 — Student Dashboard: Welcome, Sudharshan Kuppili. Total Applications 7, Applied 1, Shortlisted 2, Selected 3; Upcoming Interview 2026-08-24 (Shortlisted); Quick Navigation to Eligible Jobs, My Applications, and Student Profile.

3. My Applications

The **myApplications** LWC was completed and verified, backed by **MyApplicationsController**. The controller retrieves the **Student__c** record owned by the current Salesforce user, then retrieves that student's **Placement_Application__c** records.

Displayed Fields

- Job name and Company name
- Application date
- Interview date, when available
- Current application status
- Application status timeline (Applied → Shortlisted → Selected/Rejected)
- Remarks, when available

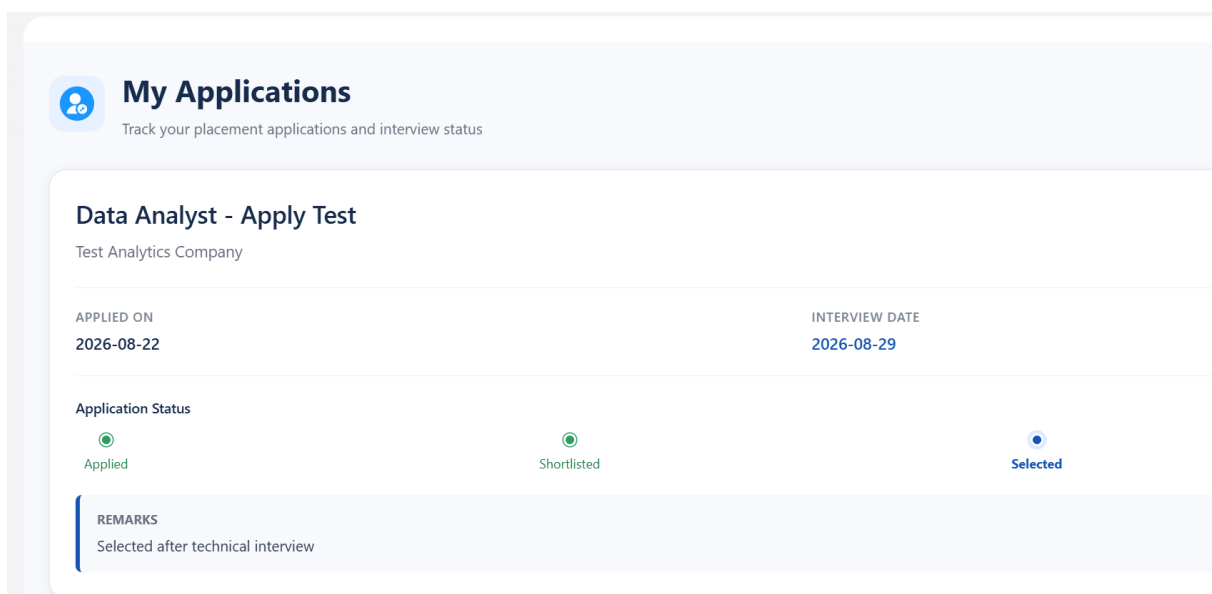

Fig 3.1 — My Applications: “Data Analyst - Apply Test” at Test Analytics Company, Applied On 2026-08-22, Interview Date 2026-08-29, status timeline showing Selected, with remark “Selected after technical interview.”

4. Student Data & Application Verification

The **Student__c** and **Placement_Application__c** records were verified directly via the Salesforce CLI against the **PlacementOrg**.

Student Record

Field	Value
Name	Sudharshan Kuppili

Field	Value
CGPA	8.75
Branch	CSE
Record Id	a08NS00001UpMRcYAN

Application Records (7 Total)

Job	Status	Applied On	Interview Date
Data Analyst - Apply Test	Selected	2026-08-22	2026-08-29
Software Engineer - Eligible Test	Shortlisted	2026-08-21	2026-08-25
Java Developer Test	Shortlisted	2026-08-11	2026-08-24
Software Engineer	Rejected	2026-08-08	null
Software Engineer	Selected	2026-08-08	null
Software Engineer	Applied	2026-08-08	null
Software Engineer	Selected	2026-08-07	null

```

5. Duplicate Application Handling

Duplicate application behavior was tested and confirmed. When a student attempts to apply for a job that has already been applied for, the system displays the error message shown below, preventing a duplicate **Placement_Application__c** record from being created.

"You have already applied for this job."

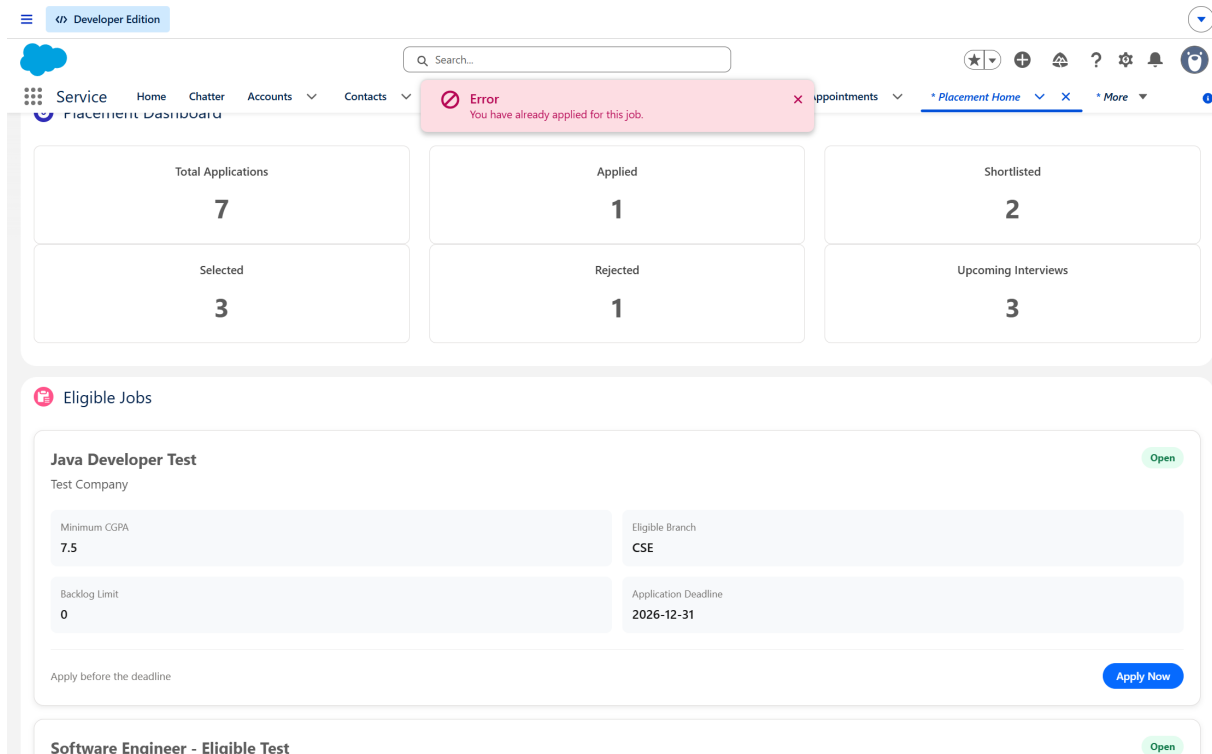

Fig 5.1 — Duplicate-application error displayed when re-applying to “Java Developer Test,” confirming the validation is active and working as expected.

6. Student Portal Permission Set

A dedicated Student Portal permission set was created and deployed to grant students access to the Apex controllers that power their portal experience.

Attribute	Value
Metadata file	Student_Portal.permissionset-meta.xml

Fig 8.1 — Terminal output of `sf apex run test` showing `AppointmentTriggerHandlerTest.testDuplicateAppointment`: Pass, and the Test Summary block reporting Outcome Passed, Tests Ran 1, Pass Rate 100%.

9. Final Day 11 Status

Completed

- Student Dashboard verified
- My Applications verified
- All 7 student applications visible and correctly stated
- Duplicate application validation working
- Student Portal permission set deployed
- Permission set assigned to the Salesforce user

- Apex deployment successful (52/52 components)
 - Apex test passed (AppointmentTriggerHandlerTest.testDuplicateAppointment)
 - Screenshots and terminal evidence collected for documentation
-

10. Conclusion

Day 11 focused on finalizing and validating the student-facing placement functionality of the Placement Management System. Application data was verified directly in Salesforce, the required Student Portal permission set was configured and assigned, deployment to PlacementOrg completed without errors, and the available Apex test passed successfully. The student portal is ready for the next stage of the project.
